

High Power UV-C LED

Product Specifications

6060 SMD TL Packaged LEDs

BOLB Inc.
Livermore, California
V1.85TL June 2021

WARNING UV emitted from this product. Avoid eye and skin exposure to unshielded product

AVERTISSEMENT UV émis par ce produit. Éviter l'exposition des yeux et de la peau à un produit non protégé

ADVERTENCIA Emisión de rayos ultravioleta por este producto. Evite la exposición de los ojos y la piel al producto sin protección

警告 この製品から放出される紫外線。シールドされていない製品への目や皮膚の露出を避ける

SMD6060 type package

Example:

S6060TL-DR250-W275-P90-V6.5
S6060TL-W275-P90-V6.5

Interpretation:

Surface Mount type 6.0 x 6.0 mm packaged LED
Nominal Drive current = 250 mA
Peak wavelength = 275 +/- 5nm
Power output @ 250mA = 90 mW (+/-10%)
Forward voltage @ 250mA = 6.5V (+/- 0.5V)

Parameter	Symbol	Unit	Typ.
70% Power Lifetime	L70	hours	3000*
50% Power Lifetime	L50	hours	5000*

*Values based on standard Bolb test conditions $25^{\circ}\text{C} \pm 2^{\circ}\text{C}$ solder-point temperature

*Subject to change: please inquire about latest update

Additional Testing and Certifications:

- Moisture Sensitivity Test: MSL Rating 5/5A
- BOLB LEDs are RoHS and REACH compliant

Packing

Attention! The SMD6060 Tall Lens variant are shipped with standard static protected H44-250- trays (100 ps. SMD per tray maximum)

FIG 8. Solder reflow temperature profile

- Recommended solder composition: SnBiAg alloy or 174-T4 soldering paste)
- Recommended stencil thickness is 60~80um
- Recommended stencil solder paste area is 60~80%
- Forming gas (5%-7%H₂ in N₂) ambient recommended for best results
- After reflow soldering, Rapid cooling should be avoided
- When soldering, do not use a none calibrated hot plate. A convection type reflow oven is preferred. (Fig 8.)

Must not use heat gun (blower) for soldering

ESD Protection

Workplace setup should follow the recommendations given in JEDEC standard document JESD625B “Requirements for Handling Electrostatic-Discharge-Sensitive (ESDS) Devices” or IEC 61340-5-1,2 and 3. The operators should be properly trained to handle UVC flipchips according the guidelines listed below:

- Always wear conductive wrist straps that is continuously monitored when working or handling assembled boards containing unprotected chips.
 - Use an ion blower to neutralize the static discharge that may build up on the surface of the UVC flipchips during storage and handling.
 - Always keep unused UVC flipchips in the protective ESD storage bag. Depending on the final application, it may be necessary to include additional ESD protection, such as a TVS protection diode on the substrate on which UVC flip chip is reflowed. Bolb Inc. includes a TVS chip inside each LED package.
 - Use tweezers to pick up UVC LEDs, teflon coated tweezers would be recommended to avoid scratching UVC LEDs.
 - Recommend holding the sidewalls of the LEDs (See Fig 10.)
- *Do not apply pressure to the dome lens on packaged LED.

WARNING UV emitted from this product. Avoid eye and skin exposure to unshielded product

AVERTISSEMENT UV émis par ce produit. Éviter l'exposition des yeux et de la peau à un produit non protégé

ADVERTENCIA Emisión de rayos ultravioleta por este producto. Evite la exposición de los ojos y la piel al producto sin protección

警告 この製品から放出される紫外線。シールドされていない製品への目や皮膚の露出を避ける

UVC LEDs emit deep ultraviolet radiation, with extremely high intensity near their surface. This allows rapid disinfection but safety precautions must be observed during assembly, testing and field use.

By purchasing the UVC chips (bare dice), packaged LEDs or arrays and from BOLB Inc., the customer agrees to indemnify the manufacturer of any bodily harm as a result of failure to follow the common sense precautions, or warnings and guidelines contained within this Specifications.

It is the buyer's responsibility to properly design products that ensure safety of end users.

All assembly workers, operators and bystanders must wear eye and skin protection when the UVC LEDs are energized. Bare-eye observation (including through microscopes) and bare-hand handling of a UVC LED in operation is **PROHIBITED**.

UVC light can be easily absorbed, so any oil or other absorbent liquid or solid substance must **NOT** be allowed to touch the sapphire side of the UVC chip, or the dome lens on a packaged LED.
